Science in the service of beauty

Reviderm is a renowned German dermocosmetics brand. Using decades of scientific innovation and the latest advances in dermatology, they make premium skincare products and treatments.

Reviderm treatments are based on a deep understanding of skin physiology, enabling a personalised approach to skincare that meets each client's individual needs. With science and skincare working in synergy, Reviderm helps to unlock the full potential of the skin – health, beauty, and resilience.

How the treatments work

Before the first treatment with microdermabrasion (MDA) or ultrasound (US), a specialised skin diagnostic device is used to analyse the skin on your face. This gives us crucial information about the current condition of your skin, including hydration, elasticity, sensitivity, melatonin level, sebum level, wrinkles, pores, and impurities, enabling us to provide personalised advice based on the specific needs of your skin. We work with you to choose the treatment or package that is best suited to your needs. We also provide advice on the best use of cosmetics to maintain the condition of your skin, introducing you to high-tolerance dermocosmetics with biologically active ingredients that are scientifically proven to penetrate deep into the skin.

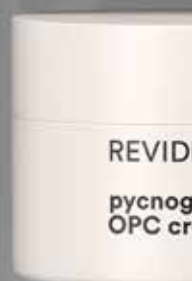

Individual treatments last from 30 to 110 minutes.

Effects of Reviderm treatments:

- ▶ Facial skin regeneration and rejuvenation
- ▶ Facial skin reinvigoration
- ▶ Reduction of acne
- ▶ Facial skin lifting
- ▶ Improvement of hyperpigmentation and keratosis

Lasting results visible immediately...

- ▶ Optimum results in the shortest time
- ▶ Even after the first treatment, the skin is smoother, and more toned and elastic

Price list

Thermalium Deep Clean treatment, 60 min 75 €

This deep cleansing treatment is perfect for skin in need of thorough cleansing and reinvigoration. After cleansing and enzyme scrubbing, we soften the skin by massaging it with a combination of AHA emulsions, facilitating the mechanical removal of impurities, excess sebum, and dead skin cells without aggressiveness or skin damage. After consulting the beautician, Thermalium Deep Clean can be combined with SkinPeeler ultra microdermabrasion. After the treatment, the skin is able to breathe and is visibly clearer, reinvigorated, and more balanced, with an even tone and fewer impurities. The treatment is recommended for all skin types, especially oily skin, skin with impurities, and acne-prone skin.

Combined with Hi-Tech - SkinPeeler ultra, 70 min 115 €

Microdermabrasion basic (MDA), 70 min 90 €

The basic SkinPeeler ultra treatment is suitable for all skin types. As a supplemental treatment, it heals the skin. It is also suitable for skin with pathological symptoms in combination with prescribed treatments. The process stimulates the renewal of epidermis cells, thickens the epidermis and dermis, and increases local blood circulation in the skin, thus boosting the absorption of active ingredients. An effective and intensive scrub treatment that uses aluminium oxide microcrystals. Completely painless, this method successfully treats sun-damaged and aging skin, severely calloused skin, pigmentation imperfections, and impurities. It will rebalance stressed skin.

Ultrasound therapy (US), 60 min

90 €

Suitable for all skin types, the basic ultrasound treatment is designed for personalised optimization of healthy skin and for supporting the treatment of pathological skin conditions. Penetrating deep into the subcutaneous tissue, the ultrasound provides deep hydration, promotes cell regeneration and improves microcirculation for radiant, smooth, revitalised skin. After the treatment, the skin is visibly refreshed with improved texture and firmness. The treatment is ideal for people looking to improve the health and appearance of their skin.

Combined with Fractional radiofrequency

FACE, 80 min

110 €

FACE, NECK, AND DÉCOLLETÉ, 100 min

130 €

Hydration treatment (US), 70 min

120 €

This intensive treatment for dehydrated skin significantly reduces the feeling of tightness and the appearance of visible lines caused by the lack of hydration. Deeply moisturising the skin, it promotes natural hydration for a fresh and radiant look.

Combined with Fractional radiofrequency

FACE, 90 min

140 €

FACE, NECK, AND DÉCOLLETÉ, 110 min

160 €

Combined with ultrasound:

Fractional radiofrequency uses the latest radio wave technology. It is a non-invasive, safe, effective method for rejuvenation.

- ▶ It results in firmer skin and reduces wrinkles and scars.
- ▶ The skin is more elastic and toned.
- ▶ It promotes the production of collagen and elastin, and boosts skin renewal.
- ▶ It reduces scarring from adolescent acne.

Treatment duration: The first improvements in the skin are visible immediately after the first treatment. The final effect is visible after 2 to 6 months, when new collagen fibres begin to be produced in the skin.

Recommended number of treatments: To achieve optimal results, 3 to 6 consecutive treatments 10 to 14 days apart are recommended. 5 to 8 treatments are recommended for more severely affected skin, or for moderate to more visible wrinkles.

To eliminate a wide range of skin problems: enlarged pores, stretch marks, sagging skin, hyperpigmentation. It helps the skin regenerate faster and gives it a smoother, more even surface. The radiofrequency treatment can also be used on the neck and décolleté.

Beauty Break treatments

Beauty Break treatments are designed to be quick but highly effective, giving your skin intensive care and achieving visible results in a very short time. They are the perfect choice for people looking for a quick solution at short notice.

Moisture Beauty Break, 30 min 55 €

A quick treatment for skin in need of immediate and intensive hydration, it is particularly suitable for dry and dehydrated skin. The result is smooth, velvety soft skin.

Refining Beauty Break, 30 min 55 €

This treatment harnesses the power of AHA scrubs to deeply cleanse and purify skin texture and pores. The result is soft, smooth, radiant skin.

Vitality Beauty Break, 30 min 55 €

The perfect choice when your skin needs a quick revitalising, refreshing effect. The collagen mask and Instant Lifting Booster result in firm, smooth, radiant skin.

Anti-aging treatments

Age prevention treatment (MDA and US), 70 min **120 €**

The treatment is designed to prevent and minimise the first signs of aging. It provides intensive regeneration for skin that is starting to lose its firmness, radiance, and elasticity. Using selected active ingredients, the skin is deeply nurtured for a fresh, youthful appearance.

Global anti-aging (MDA and US), 90 min **155 €**

Perfect for skin with moderate to more visible signs of aging, which is in need of regeneration. Due to age or to exposure to the sun, the skin is rough and wrinkled, affected by loss of firmness and elastosis. The complexion becomes dull and facial contours start to sag. In some cases there is visible vascular damage. In cases of pronounced aging caused by UV light, the skin may become rough or leathery. Degradation processes in the skin matrix, cell damage, and slower cell metabolism lead to skin deterioration. Supporting the skin's natural repair mechanisms in the epidermis and dermis helps it to become smoother and to regenerate volume from within.

Skin diagnostics, 20 min

19 €

Skin diagnostics are free of charge before the first treatment using MDA or US.
